

As a supporter of K-Love stations I feel it serves the community by giving a choice to people who don't wish to hear the vulgarity of other stations. The effect on the local community is one of disorder as it would be difficult to organize and pay for a commercial free radio service locally. It seems a very good use of resources to have one centralized station that serves so many. I believe a radio service such as K-love is in the public interest because it promotes all things that are positive about being human and helping your fellow man.
